## FICCI 92nd Annual Convention INDIA: Roadmap to \$5 Trillion Economy

Established in 1927, FICCI is the largest and oldest apex business organisation in India. Its history is closely interwoven with India's struggle for independence, its industrialisation, and its emergence as one of the most rapidly growing global economies.

A non-government, not-for-profit organisation, FICCI is the voice of India's business and industry. From influencing policy to encouraging debate, engaging with policy makers and civil society, FICCI articulates the views and concerns of industry. It serves its members from the Indian private and public corporate sectors and multinational companies, drawing its strength from diverse regional chambers of commerce and industry across states, reaching out to over 2,50,000 companies.

FICCI provides a platform for networking and consensus building within and across sectors and is the first port of call for Indian industry, policy makers and the international business community.

A joint effort of IPMMA with FICCI goes a long way in our associations' ability to reach out at a National level to the Govt. of India (GOI) and have our industry issues/suggestions for change in policy or consideration voiced at appropriate forums/levels.

**Mr. Oswin D'Souza**  
IPMMA representative  
for FICCI

IPMMA has associated itself fruitfully with FICCI in the past few decades ever since our inception, lately it has shown an even better and closer interaction. IPMMA representative, Mr Oswin D'Souza, for the second consecutive year is the FICCI-Maharashtra State Council-MSME executive member.

Some efforts in the past year has crystallized in participating in FICCI-MSME meeting with the Joint Secretary, New Delhi a gathering in which MSME issues were highlighted to the Central Government.

Our IPMMA representative has also been attending regular meetings held at FICCI Mumbai office; one such interaction was held on budget day where our FICCI Maharashtra-MSME team was part of a live group on budget day with all FICCI offices, an interactive session on budget analysis with industry members.

A recent meeting held by GOI with Union Minister of Finance, Ms Nirmala Sitharaman, on post-budget interaction with industry bodies within Mumbai was held on Feb 07, 2020. IPMMA representatives attended the event on behalf/invoke of IPMMA-FICCI.

Due to the active participation and support received by FICCI from IPMMA, we were honoured to be eligible to nominate one of our members for the National Executive Elections to represent industry bodies, held on Dec 20, 2019 in New Delhi. We also attended the FICCI AGM for industry bodies.

We were also happy to attend the FICCI 92nd Annual Convention "India: Roadmap To A \$5 Trillion Economy"

It was enlightening to hear views from government policy makers in the form of present/past Parliamentarians, various Industry leaders. Some of the eminent speakers for this convention said following:

Mr Piyush Goyal, Minister of Commerce & Industry, Govt of India, said

that "with the combined effort of industry and all stakeholders of the economy, the target of India becoming a \$5 trillion economy is doable. If we all accept our power, positions as a greater responsibility to a better and brighter future to all Indians. I think there is no doubt in my mind that India has a glorious future. The \$5 trillion economy is doable, is possible and shall be done. That's our commitment to each one of you."

Mr Anil Agarwal, Founder & Chairman-Vedanta, said "It is important for us to take risk. The potential that India has for Indians is unprecedented. It is a conducive environment for business to grow and the best time for all of us to be risk-takers."

Mr Agarwal while sharing his perspective on the education system said, "Younger generation of India is extremely capable and have a very strong value system. Every child has some or the other capability, it is our duty to motivate them and provide opportunities to succeed." He said that India can also become world's best country in providing education and I want to create another Harvard University in India and to make this dream come true, we are doing everything possible.

Dr Gita Gopinath, Chief Economist, International Monetary Fund (IMF) speaking at the FICCI AGM said that the country needs to strengthen its financial sector and fix the credit supply problem to reverse the ongoing economic downturn. There has been a sharp decline in private investment in the last two quarters and the core problem lies with the financial sector. The credit supply problem still persists in some segments of the NBFCs that leads to the MSMEs and the housing sector.

"The stress associated with the finance sector, the banks and the NBFCs, is more persistent and is deeper than many projected. The first place to address is the accelerated clean-up of the banks. This will require more institutional infrastructure. So that the insolvency and bankruptcy code, resolution process can happen rapidly. It's important for banks to be well capitalised," stated Dr. Gopinath.

Mr Nitin Gadkari, Minister of Road Transport and Highways and MSMEs, said that Indian industry, by using the best technologies of the world, should help India in cutting imports and becoming more export-oriented. "We are importing goods which can be produced in the country itself", and stressed on reducing dependence on imports.

Mr Gadkari pointed out that Indian exports contribute only 2.6% to the global trade, as compared to China, which leads with a share of 17%. He said that the problems on the trade front that China is currently facing are a "blessing in disguise" for India, which can increase the share of its exports in world trade to 8-10%. This is important for the realization of the goal of a \$5 trillion economy.

Eminent CEOs of India Inc highlighted the need for Indian manufacturing to become globally competitive and joining the global value chain as the key ingredient for making India a \$5 trillion economy.
